## PREFACE

THE tables (Nos. 1 to 11) of retail prices of food-grains and salt contained in Part I of this volume, and printed on pages 2 to 91, are compiled from half-monthly statements received from most districts in India which are published regularly in the *Gazette of India*.

The districts are grouped with reference to their climatic character and rainfall, and for each such group, as well as for each province, an annual and a quinquennial average has been struck. The quinquennial averages are given in separate tables (Nos. 12 to 22), pages 92 to 131.

Table No. 33 in Part I (pages 164 to 171) gives the prices of the most important food-grains at twenty-three stations in different provinces of the country, the stations being selected to give a fair indication of the general level of prices throughout each province.

Tables Nos. 35 and 37 in the same part (pages 180 to 182 and 185 to 188) are compiled from monthly lists which have for many years past been prepared by district officials in the Bombay Presidency for the information of the army. These tables contain the prices of provisions and tobacco in addition to the prices of food-grains.

The record of wholesale prices in Part II (tables 39 to 52) is a compilation from the price-current of the Chamber of Commerce, for Calcutta; from various statements, for Bombay, Karáchi, Madras, and Rangoon; from the *Economist*, for London; and from official statements.

Tables Nos. 53 to 57 in Part III are a record of wages in each district of each province and in certain State railways and Government establishments, also in some industrial establishments in various parts of the country.

Retail prices are expressed in India generally, and in Part I of this volume, in terms of the number of sers sold for a unit of money, namely, one rupee. To assist in translating this expression into the amount in money paid for a unit of quantity, a table is prefixed to the volume stating the equivalent of "sers per rupee" in "annas per ser" (one anna being the sixteenth part of a rupee).

May 29, 1902

J. E. O'CONOR  
Director-General of Statistics

# CONTENTS

## PART I—RETAIL PRICES

Table of Equivalentents . . . . .	Page
Average annual prices of Food-grains and Salt (1861—1901) :	vii—x

No. 1—Rice (common) . . . . .	Page	No. 7—Kangni or kakun . . . . .	50—53
„ 2—Wheat . . . . .	2—13	„ 8—Gram . . . . .	54—63
„ 3—Barley . . . . .	14—23	„ 9—Maize . . . . .	64—69
„ 4—Jawar or cholum . . . . .	24—29	„ 10—Arhar or thur . . . . .	70—79
„ 5—Bajra or cumbu . . . . .	30—37	„ 11—Salt . . . . .	80—91
„ 6—Marua or ragi . . . . .	38—45		
	46—49		

Quinquennial averages deduced from the figures in tables Nos. 1 to 11 :

No. 12—Rice (common) . . . . .	92—96	No. 18—Kangni or kakun . . . . .	113—114
„ 13—Wheat . . . . .	97—100	„ 19—Gram . . . . .	115—119
„ 14—Barley . . . . .	101—103	„ 20—Maize . . . . .	120—122
„ 15—Jawar or cholum . . . . .	104—107	„ 21—Arhar or thur . . . . .	123—126
„ 16—Bajra or cumbu . . . . .	108—110	„ 22—Salt . . . . .	127—131
„ 17—Marua or ragi . . . . .	111—112		

Variations in the quinquennial averages in tables Nos. 12 to 22, the prices for 1871-75 being taken as 100 :

No. 23—Rice (common) . . . . .	132—136	No. 28—Marua or ragi . . . . .	149—150
„ 24—Wheat . . . . .	137—140	„ 29—Gram . . . . .	151—154
„ 25—Barley . . . . .	141—142	„ 30—Maize . . . . .	155
„ 26—Jawar or cholum . . . . .	143—145	„ 31—Arhar or thur . . . . .	156—157
„ 27—Bajra or cumbu . . . . .	146—148	„ 32—Salt . . . . .	158—163

No. 33—Average annual prices of certain Food-grains at selected stations (1861—1901) :

Rangoon . . . . .	164	Karáchi . . . . .	168

1900	100	209	130	148	182	213	96	96	161	161	132	134	107	119	169	107	134	171
1901	100	216	104	132	173	197	97	97	134	151	119	117	89	102	184	110	104	177

NOTE.—In this table, the variations in the prices of gold (measured in silver) are arrived at by multiplying the price of bar silver in London in 1873 ( $=59\frac{1}{2}d.$ ) by 100 and dividing the product by the price of bar silver in the particular year

Example—

Price of silver in 1899= $27\frac{7}{8}d.$  (table No. 45); price of silver in 1873= $59\frac{1}{2}d.$ ; price of gold in 1873=100. The variation in the price of gold in 1899 is then worked out, thus—

$$27\frac{7}{8} : 59\frac{1}{2} :: 100 : 215$$

The variations in the prices of the other articles in this table are calculated thus: As the variation in the price of gold in table No. 46 is to the variation in the price of gold in this table, so is the variation in the price of the article in table No. 46 to the variation required

Example—

Variation in the price of gold in table No. 46=100; variation in the price of gold (measured in silver) in 1899, in this table = 215; variation in the price of copper (measured in gold) in 1899=86 (table No. 46). Therefore

$$100 : 215 :: 86 : 185$$

No. 48—AVERAGE ANNUAL WHOLESALE PRICES of FOOD-GRAINS and OTHER ARTICLES  
(Prices are stated in rupees and decimals of a rupee per ten maunds for all articles except Live-Stock)

NOTES—(1) Where no rates are given, there were no quotations in the price-current

(2) The prices entered are not all stated on the same basis. They represent in some cases contract rates, in others averages of price-current and contract rates, or averages of price-current and fixed rates, or averages of contract and fixed rates or averages of contract, price-current, and fixed rates, or again averages of price-current rates

1889	.	.	.	.	5'2	1902	.	.	.	.	5'69

The manager of the mill explains :

"The rate for 1877 appears to be abnormal, probably because there were few employés and the mill had only recently started. If the wages of one or two men more highly paid than the others be left out, the rate is Rs 4-3."
